

Plans & Programs

RVMPO coordinates many plans, projects, and studies. It prepares four primary federally-required plans, programs, and findings. These are designed to create a vision, implement and monitor projects, conform to air quality requirements, and provide financial guidance.

Air Quality Conformity Determination

The RVMPO prepares an AQCD every 3-4 years to accompany the federal component of the RTP and the TIP. The MPO must show that the region will meet federal and state air-quality standards for the duration of the planning period in order to receive federal funds.

Regional Transportation Plan

The RTP is the primary document guiding future transportation improvements and forecasting available revenue and project costs. It sets goals based on federal guidelines and public and stakeholder input. It is updated every 4 years with a minimum horizon of 20 years. Projects using state or federal funds must be included in the RTP. The goal of the RVMPO is to develop and maintain a multimodal transportation system that serves regional needs, promotes safety, supports economic development, and incorporates public input in transportation decisions.

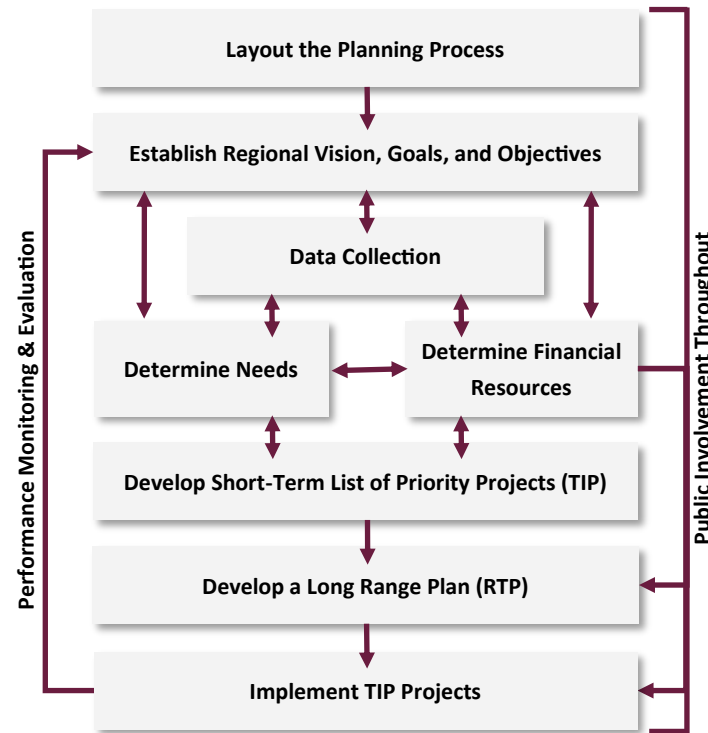

Transportation Improvement Program

The TIP documents the anticipated costs of projects and the expected revenues from local, state, and federal funding sources every 3 years. The TIP is the tool that allows federal funds to be programmed towards projects. To receive federal funds, projects must be included in the TIP.

Unified Planning Work Program

The UPWP documents the transportation planning activities and products the RVMPO and RVTD will conduct or complete over a year's time.

Transportation Planning Process

Public input is used to:

- Identify the goals, visions, opportunities, and needs of the region
- Identify significant projects
- Define alternative strategies
- Develop a long-range transportation plan that includes a list of eligible projects

From Planning to Implementation

Transportation projects are only implemented after a careful, inclusive planning process. Once needs are identified, projects are prioritized according to available funding. This process results in the Transportation Improvement Program that tells which of the identified projects can be funded and built in the near future.

Committees

Policy Committee

The final word on RVMPO planning decisions.

Technical Advisory Committee (TAC)

Technical staff from the public works and planning departments of member jurisdictions

Public Advisory Council (PAC)

Residents from geographic and special-interest areas within the RVMPO

Each committee also receives public comment at all meetings.

Planning Principles

MPOs were created in order to ensure that existing and future expenditures for transportation projects and programs are guided by the **3C Process**:

Cooperative

The RVMPO works with state and local stakeholders, including interested individuals and special interest groups.

Continuous

Key documents are continuously reviewed and updated as needed.

Comprehensive

Multiple transportation modes are considered, such as: *transit, personal vehicle, biking, walking, freight, air*, as well as multiple factors, including: *air quality, social justice and employment*.

This guide is to help keep you informed and encourage your participation in the transportation planning activities of the Rogue Valley Metropolitan Planning

What is an MPO?

A metropolitan planning organization (MPO) is designated by law for areas with a population of 50,000 or more. They coordinate the area's transportation plans and the transportation planning process. Federal funds for transportation projects and programs are channeled through MPOs. **The RVMPO** covers the urbanized area of Jackson County and includes the communities of Ashland, Talent, Phoenix, Jacksonville, Medford, Central Point, White City, and Eagle Point.

MPO Responsibilities

- Develop and maintain a long-range **Regional Transportation Plan (RTP)**.
- Develop and maintain a short-range project programming document, the **Transportation Improvement Program (TIP)**.
- Coordinate transportation decisions among local jurisdictions, state agencies, and transit operators via an **annual work program (UPWP)**.
- Manage the regional **travel demand model** for the purposes of assessing, planning, and coordinating regional travel impacts.

RVMPO also performs regional **air quality conformity** analyses and demonstrates regional transportation conformity for carbon monoxide (CO) and particulate matter (PM₁₀).

Why Should I Get Involved?

If you use transportation, you are involved!

You probably used some form of transportation today. Whether it's a car, bike, bus, wheelchair or walking – you are involved.

The transportation system is designed to serve you. The funding to develop and maintain our transportation system comes from several sources – including your tax dollars!

Your input is critical to the overall quality of our region's transportation system, and to ensure your transportation needs are being met.

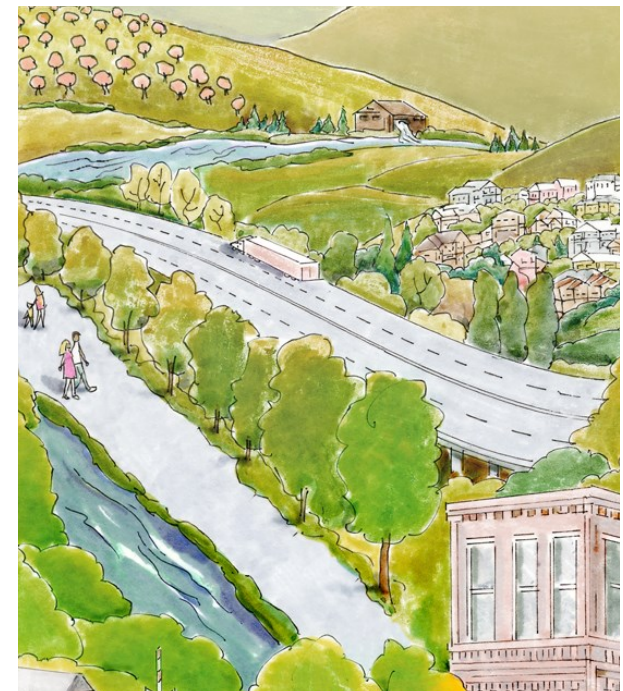

Interested in Getting Involved?

- Consider serving on the **Public Advisory Council (PAC)**, which makes recommendations to the MPO Policy Committee
- Visit the **RVMPO website**, www.rvmpo.org to learn about the MPO, future events, and current projects
- Join the **RVMPO email list**. Email rvmpo@rvcog.org or call us at 541-664-6674.
- **Why are there MPOs?**
